Overview

- The *From The Top Assessment Tool* is designed to gather opinions from members of the ELFT governing board (execs and non-exec) on a variety of structures and processes believed to be important to an organization's approach to quality improvement.
- This instrument was administered to all 14 members of the ELFT governing body. Ten (10) of the members responded for a 71% response rate.
- The responses options for each item were: Not in place, Just beginning and Established practice.
- The following two graphs display the results. The first graph presents the order of the items as they appeared on the assessment tool. The second graph reveals the responses in rank order based on the "Established practice" response.

Original Order of the Items on the Assessment Tool

Order of the Items Sorted by the "Established Practice" Response
