

Paper light on Rosebank Ward

Ashley Coad, Emmanuel Addo, Francesca De Ritis, Rufaro Mudarikwa, Olivia Leadbeater, Rebecca Lingard, James McGill and Mahmoodah Khanom

Aim

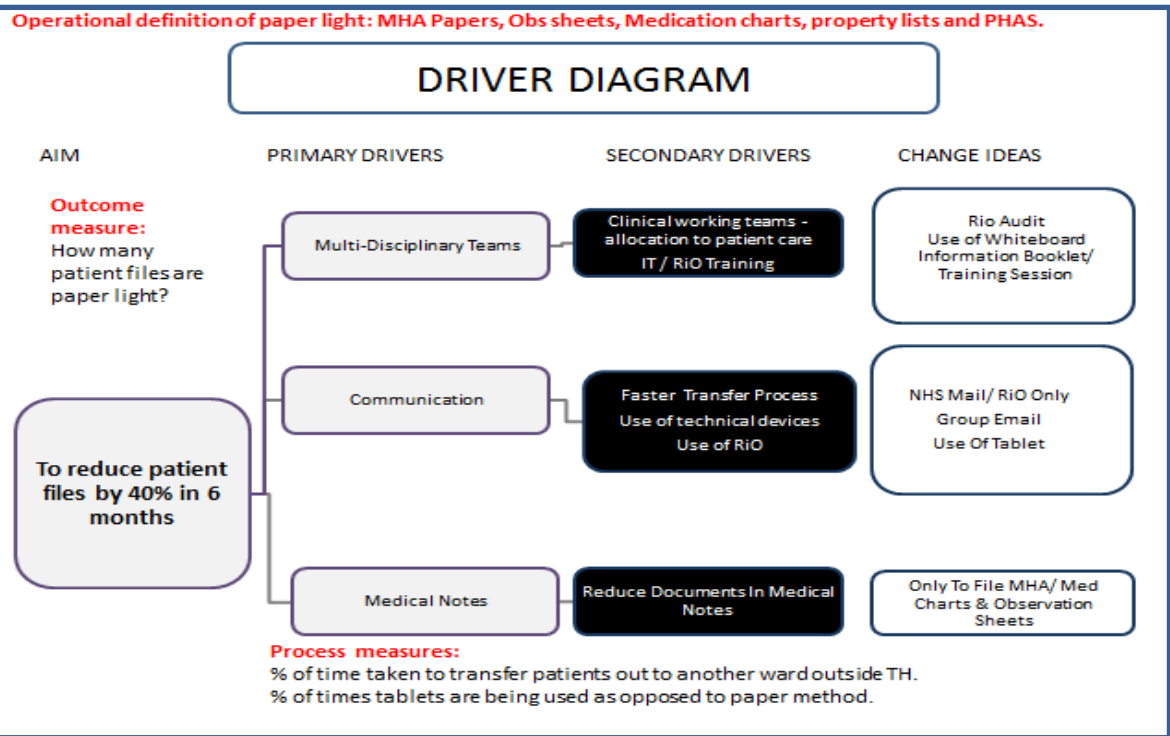

To become paper light by 40% in 6 months (31st March 2016)

Why is this important to service users and carers?

Ultimately, to deliver better care for patients by handling, storing and sharing patient information safely and securely.

- One system – Simplicity, time efficient, and less chances of losing information, accessibility
- Better communication
- Spend more time with patients
- Environmentally friendly
- Highly dependent on paper notes when we are supposed to be 'paper light'
- More control

Driver diagram

What are we testing?

Outcome measures

- Outcome measure:** How many patient notes are paper light?
- Process measure:** % of time taken to transfer patients out to another ward outside of TH.
- % of time tablets are being used as opposed to paper method.**
- Balancing measure:** Staff satisfaction
