## Before next time

- Further review and reflection on what was learnt about your population as part of the 3 part data review...
- Is it clear what has been learnt about assets (as well as needs)? Is this clearly captured somewhere for the project to refer to?
- Look at how this learning connects with the theory of change on the driver diagram (if this exists yet)
- Find out how the project is organising understanding of stakeholders; has stakeholder mapping been done?
   Where is this saved, so it can be added to as more is learnt? If not, start this with project team before next time

### Drivers of population health

**Assets** 

Local Government Services, Police, GPs, Health Services, Parks, Educational Establishments, Children's Centres, Businesses

Faith groups, Sports/Youth Clubs, Informal Networks, Self-Help Groups, User Led Groups Voluntary Organizations, Community

**Families, Friends, Carers** 

Passion, Talent, Skills, Experience, Knowledge, Time, Care, Opportunity

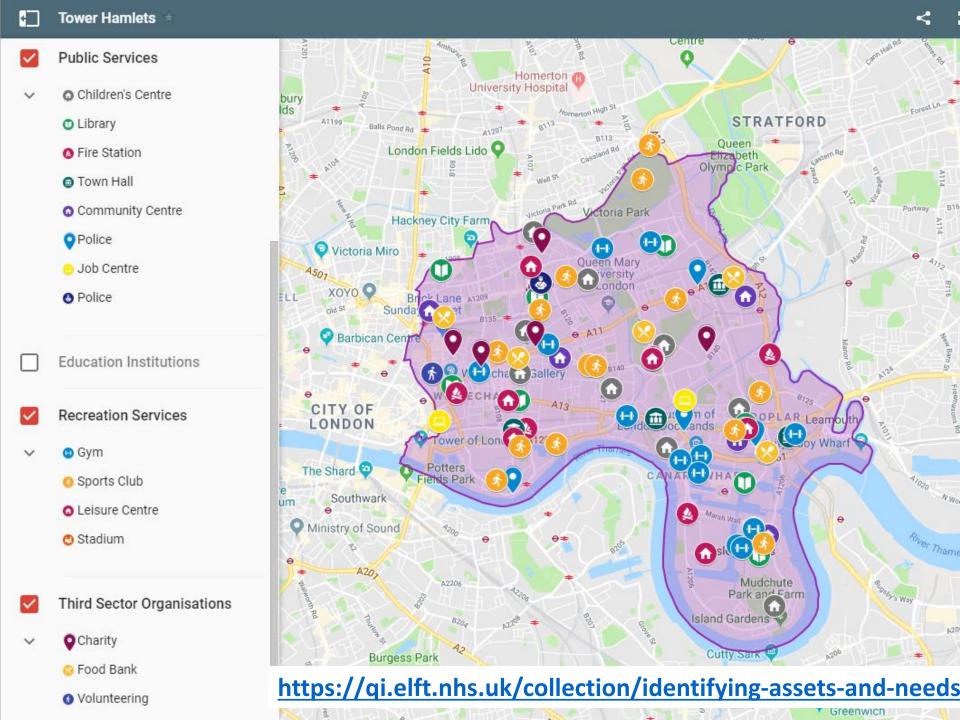

Meaning, Value,
Purpose,
Development,
Connection

**Organisations** 

**Associations** 

**Individual assets** 

**Internal assets** 

# Stakeholder Mapping

Further useful guidance on this from Imperial is available here:

https://www.imperial.ac. uk/media/imperialcollege/administrationand-supportservices/staffdevelopment/public/imp ex/Stakeholdermanagement-21jun17.pdf

#### Meet their needs Key player key players focus efforts on engage & consult on interest this group area influence/power of stakeholders try to increase level of involve in governance/ interest decision making bodies aim to move into right hand engage & consult regularly box Show consideration Least important make use of interest through inform via general involvement in low risk areas communications: newsletters. keep informed & consult on website, mail shots. interest area aim to move into right hand potential supporter/ goodwill box. ambassador

Interest of stakeholders

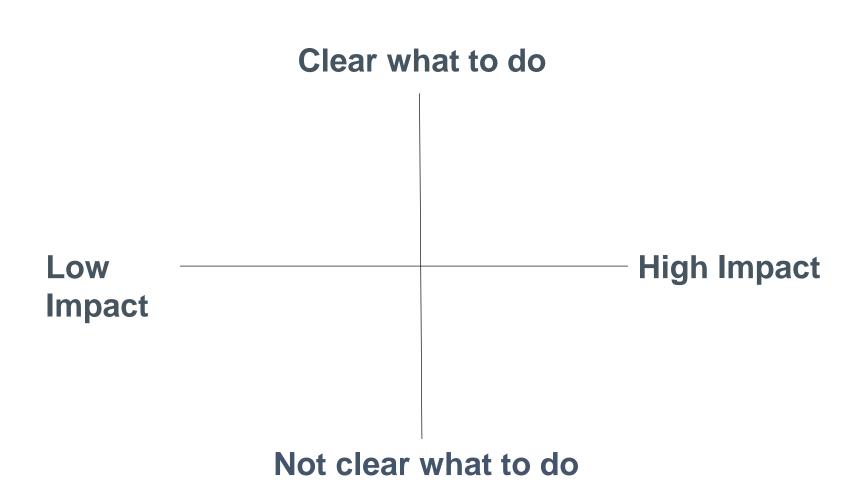

# Top tools for narrowing down/deciding on change ideas/initiatives

I mentioned these tools in our discussion. Please find further information below...

You can use one or both together depending on the needs of your project – totally up to you!

# 1. Matrix of Change Ideas/Initiatives

Good for organising initiatives based on important criteria. You can choose your criteria, but for example high impact/low impact, clarity of what to do (might help you to know if it needs PDSA or not), low cost/high cost, etc.

Matrix example from Beds LD (the team had so many ideas after the engagement event, we just had to narrow them down!)

# 2. Multi-voting

Cluster together similar ideas from brainstorming exercise

Use dots to vote:

What are your personal favorites?

What idea would you most like to try on your unit?

What idea do you think will have the biggest

impact toward achieving the aim?

Participants each have 4 dots

Participants can distribute their dots however they want — all on one idea, each dot on a separate idea, or anything in between

Report out on favorite ideas (where there are most dots)
